## Product Catalog

# DC CLIPS

## Dc Clips

DC clips are specialized electrical connectors designed for direct current (DC) applications. They are used to securely connect or clamp DC wiring, providing a stable and efficient electrical connection. DC clips are commonly employed in various electrical systems, such as solar power installations, automotive wiring, and electronic circuits, where a reliable and consistent connection is essential.

## Features

- Durable construction for long-lasting performance in DC applications
- Lightweight and compact design for easy installation
- Provides secure, reliable electrical connections
- Compatible with a wide range of wire sizes and types
- Minimizes the risk of loose or intermittent connections
- Ideal for automotive, solar power, and electronic projects

## Specifications

- Material: High-quality plastic or metal (depending on the clip type)
- Voltage Rating: Up to 60V DC
- Current Rating: Varies by clip size (typically up to 30A)
- Compatibility: Suitable for various wire gauges
- Temperature Range: -20°C to 85°C
- Standard Compliance: RoHS, UL

| Size   |
|--------|
| 20 x 3 |
| 25 x 3 |
| 25 x 6 |
