

BRASS MALE BUSH

Product Catalog

BRASS MALE BUSH

Brass Male Bush

Brass Male Bushes are durable, high-quality connectors used for reducing or extending pipe fittings in plumbing, electrical conduits, and industrial applications. Made from premium brass, they offer excellent corrosion resistance and strength, making them ideal for use in harsh environments, including marine and outdoor settings. The male threading allows for easy and secure connections to female threaded components, ensuring a tight and leak-proof fit. Suitable for both residential and industrial applications, brass male bushes provide reliable performance in high-pressure and high-temperature systems.

Features

- Constructed from premium brass for superior durability and corrosion resistance
- Male threading ensures secure connections to female threaded components
- Ideal for reducing or extending pipe fittings in plumbing and electrical systems
- Resistant to rust, chemicals, and extreme temperatures
- Suitable for high-pressure and high-temperature applications
- Easy to install and available in a variety of sizes

Specifications

- Material: Brass
- Thread Type: Male BSP (British Standard Pipe) or NPT (National Pipe Thread)
- Temperature Range: -40°C to 150°C
- Pressure Rating: Up to 300 PSI
- Available Sizes: Various options from 1/8" to 2"
- Standard Compliance: ISO, RoHS

Size
20mm
25mm
