

CABLE LUGS

Product Catalog

CABLE LUGS

Cable Lugs

Cable lugs are essential electrical connectors used to securely terminate cables and connect them to various devices or power sources. They provide a safe, durable, and efficient way to connect electrical cables to switches, transformers, junction boxes, and other equipment. Cable lugs come in various types, and are made from materials like copper, aluminum, or brass to ensure optimal conductivity and corrosion resistance.

Applications

- Automotive: Connecting battery terminals, alternators, and starter motors.
- Power Distribution: Linking heavy-gauge cables to busbars, transformers, and circuit breakers.
- Industrial Machinery: Terminating wires in control panels and junction boxes

Size			
1.5 x 4	10 x 12	70 x 10	240 x 12
1.5 x 6	16 x 6	70 x 12	240 x 14
2.5 x 4	16 x 8	95 x 8	240 x 16
2.5 x 5	16 x 10	95 x 10	300 x 12
2.5 x 6	16 x 12	95 x 12	300 x 16
