# CABLE MARKERS

## Cable Markers

Cable markers, such as EC types EC0, EC1, EC2, EC4, and K65, are labeling devices used to identify and organize cables, wires, and other electrical components. Made from durable materials like PVC or nylon, these markers fit various cable diameters, ranging from very small to specialized larger applications. Designed to withstand tough environments, they ensure easy identification, enhancing safety and efficiency in installations and maintenance.

## Features

- Durable construction for harsh environments
- Corrosion and temperature resistance
- Clear and legible labeling
- Versatile sizing for various cable diameters
- Secure fastening to prevent slippage
- Non-toxic materials safe for electrical use

## EC Type

EC type refers to a classification system for cable markers, identifying different sizes and applications. Each type is designed for specific cable diameters:

- EC0: Suitable for very small cable diameters.
- EC1: Fits small to medium-sized cables.
- EC2: Used for medium to large cables.
- EC4: Designed for larger cable diameters.
- K65: Typically used for specialized or larger applications.

**Material:** Made of finest soft grade, strong, durable PVC that will resist oil, grease, acid abrasion and chemicals.

Type	Dia Range mm <sup>2</sup> Min to Max	Pcs
EC-0	1.00 to 3.00	1000 Pcs Roll
EC-1	2.50 to 4.20	1000 Pcs Roll
EC-2	3.60 to 8.00	500 Pcs Roll
EC-3	5.20 to 10.00	350 Pcs Roll
EC-4	16.00 to 35.00	80 Pcs Pkt
K65	3.50 to 7.00	500 Pcs Pkt
