

COPPER FERRULES

Product Catalog

COPPER FERRULES

Copper Ferrules

Copper ferrules are small cylindrical components used to create secure, strong connections at the end of wire ropes or cables. Made from high-quality copper, they are designed to crimp onto the wire, forming a permanent loop or terminating the end to prevent fraying. Copper ferrules are commonly used in rigging, lifting, electrical wiring, and marine applications, providing both durability and conductivity.

Features

- Made from high-purity copper for superior electrical conductivity
- Corrosion-resistant for enhanced durability in harsh conditions
- Ensures secure cable terminations and prevents wire fraying
- Suitable for high-voltage and heavy-duty applications
- Easy to crimp and available in various sizes for different wire gauges
- Complies with industry safety and quality standards

Specifications

- Material: High-conductivity Copper
- Finish: Electro-tinned for extra corrosion resistance
- Sizes: Available for wire sizes from 0.5mm² to 1000mm²
- Temperature Range: -40°C to 150°C
- Voltage Rating: Up to 600V
- Standard Compliance: IEC, UL, RoHS

Size		
1.5mm	25mm	150mm
2.5mm	35mm	185mm
4mm	50mm	240mm
6mm	70mm	300mm
10mm	95mm	400mm
16mm	120mm
