INSULATED CABLE LUGS

Insulated Cable Lugs

Insulated Cable Lugs are essential electrical accessories used for secure and efficient cable terminations. Designed for residential, commercial, and industrial applications, these lugs are made from premium copper or aluminum to ensure excellent electrical conductivity and long-lasting performance. Their robust construction and corrosion-resistant properties make them ideal for use in demanding environments, including high-voltage and high-temperature settings.

Features

- Made from high-grade copper or aluminum for superior conductivity
- Corrosion-resistant to ensure long-term durability
- Easy crimping design for quick and secure installation
- Available in various sizes to suit different cable diameters
- Suitable for high-voltage and high-temperature applications
