CP-700

HYDRAULIC HAND PUMP

The CP-700 is a compact, manually operated two-stage pump delivering 700 bar (10,000 psi) output pressure. It powers crimping heads, cutters and other hydraulic equipment in the field, with a built-in pressure relief valve for safe operation.

FEATURES

- 700 bar maximum pressure output
- Two-stage pumping system for quick operation
- Compact and portable for field use
- Built-in pressure relief valve
- Compatible with hydraulic crimpers and cutters

APPLICATIONS

CRIMPING HEADS

CABLE CUTTERS

FIELD SERVICE

TECHNICAL DATA	
Max output pressure	700 bar (10,000 psi)
Pump type	Two-stage, manual
Safety	Built-in pressure relief valve
Compatibility	Crimping heads, cutters, hydraulic tools
