Wrap A Round

Wrap A Round

Wizard Pipe Wraps are high-density, heat-resistant tools designed for heavy-duty pipe marking. Each wrap features a built-in screen-printed tape measure and a comprehensive circumference and quartering scale, eliminating the need for manual calculations. Engineered for durability, these wraps resist oil, water, and fuel, and are packaged in a reusable container for convenient storage.

Description

- Screen printed tape measures (28" on Small Wrap; 36" on Medium and Large Wraps; 48" on Extra Large Wrap) which limits the need for an extra tape measure and makes mark-up much easier.
- They also include a circumference & quartering scale which limits the need for calculations because the exact circumference, $\frac{1}{4}$, $\frac{1}{2}$ and $\frac{3}{4}$ of the circumference, plus the actual diameter of pipes 2" through 30" is printed on the outside of the wraps.
- Wraps are packaged in durable, reusable containers that will hold up in your tool box.
- All Wizard Pipe Wraps are made from a non-asbestos, heat-resistant material.
- It is a high density product for heavy duty service at temperatures up to 320°F = (160°C).
- It has outstanding resistance to oil, gasoline, kerosene, water and sea water.
- The edges are thick and straight for easier, more accurate marking.
