

# SPRING CALIPERS (INSIDE, OUTSIDE, DIVIDER)

Product Catalog

# SPRING INSIDE CALIPER

## Description

Spring Inside Caliper is a precision measuring tool used to measure the internal dimensions of objects, such as the inside diameter of holes, tubes, or cavities. It consists of two curved legs joined with a spring and adjusting screw, allowing for smooth and accurate adjustment. Made from high-quality steel, it is designed for durability, ease of use, and consistent performance in both workshop and industrial settings.

## Features

- Precision measurement of internal dimensions
- Smooth spring action for consistent accuracy
- Durable high-quality steel construction
- Corrosion and wear resistant
- Easy-to-read scale or markings
- Adjustable for different sizes and diameters
- Reliable and long-lasting performance
- Compact and ergonomic design for ease of use

| Size          |
|---------------|
| 4" / 100 MM   |
| 6" / 150 MM   |
| 8" / 200 MM   |
| 10" / 250 MM  |
| 12" / 300 MM  |
| 18" / 450 MM  |
| 24" / 600 MM  |
| 30" / 750 MM  |
| 36" / 900 MM  |
| 40" / 1000 MM |

# SPRING OUTSIDE CALIPER

## Description

Spring Outside Caliper is a precision measuring tool used to measure the external dimensions of objects, such as the outside diameter of rods, shafts, or other cylindrical items. It consists of two curved legs joined by a spring and adjusting screw, allowing smooth and accurate adjustment. Made from high-quality steel, it is designed for durability, ease of use, and consistent performance in both workshop and industrial environments.

## Features

- Precision measurement of external dimensions
- Smooth spring action for consistent accuracy
- Durable high-quality steel construction
- Corrosion and wear resistant
- Easy-to-read scale or markings
- Adjustable for different sizes and diameters
- Reliable and long-lasting performance
- Compact and ergonomic design for ease of use

| Size          |
|---------------|
| 4" / 100 MM   |
| 6" / 150 MM   |
| 8" / 200 MM   |
| 10" / 250 MM  |
| 12" / 300 MM  |
| 18" / 450 MM  |
| 24" / 600 MM  |
| 30" / 750 MM  |
| 36" / 900 MM  |
| 40" / 1000 MM |

# SPRING DIVIDER

## Description

Spring Divider is a precision marking and measuring tool used to scribe circles, arcs, or transfer measurements on workpieces. It consists of two pointed legs joined by a spring and an adjusting screw, allowing smooth and accurate adjustment. Made from high-quality steel, it is designed for durability, precision, and consistent performance in workshop, industrial, and engineering applications.

## Features

- Precision marking and measurement of distances and arcs
- Smooth spring action for consistent accuracy
- Durable high-quality steel construction
- Corrosion and wear resistant
- Adjustable for various diameters and distances
- Sharp points for accurate scribing
- Reliable and long-lasting performance
- Compact and ergonomic design for ease of use

| Size          |
|---------------|
| 4" / 100 MM   |
| 6" / 150 MM   |
| 8" / 200 MM   |
| 10" / 250 MM  |
| 12" / 300 MM  |
| 18" / 450 MM  |
| 24" / 600 MM  |
| 30" / 750 MM  |
| 36" / 900 MM  |
| 40" / 1000 MM |
